**MEMORANDUM FOR ALL EMPLOYEES, DSCR/HEADS OF TENANT ACTIVITIES**

**SUBJECT: Environmental Policy**

DSCR has initiated the development of a Center-wide Environmental Management System (EMS). The Office of the Under Secretary of Defense for Acquisition, Technology, and Logistics has mandated that this system be in place and operational by December 2005. The implementation of this system will provide us with a framework for managing all of our environmental responsibilities so they become as efficient and as forward thinking as possible and more integrated into our overall daily operations.

The first step in this initiative is defining our environmental policy and our commitment to the EMS. DSCR, and its tenants, will perform our mission in support of the warfighter in concert with our stewardship responsibility to protect and conserve the environment. We are committed to the following:

- a. Complying with all applicable environmental policies, laws, and regulations.
- b. Identifying potential sources of pollution and meet or exceed DLA's goals for prevention.
- c. Assessing the effect on the environment of our activities, products, and services. Set objectives and targets to minimize adverse environmental impacts. Implement and monitor programs to achieve those objectives and targets.
- d. Actively pursuing continual improvement in our environmental management system.

This policy will be given widest dissemination. The policy itself will be maintained by Support Services and is available to the public through their office and via the DSCR-SD Internet page.

A handwritten signature in black ink, reading "James P. Totsch", is positioned above the printed name and title.
